PracaSil™-Plus

“Healing ingredients only a rainforest can provide.”

What is PracaSil-Plus?
PracaSil-Plus is a unique anhydrous silicone base that contains oil from the Pracaxi tree found in the Amazon rainforest. Pracaxi oil has anti-inflammatory, anti-oxidant, anti-bacterial, and anti-fungal properties. It is the only compounding base specifically designed for scars and skin conditions.

What can PracaSil-Plus be used to treat?
In combination with other active agents PracaSil-Plus is an ideal choice to treat the following scar related issues:

- Acne Scars
- Keloids and Hypertrophic Scars
- Painful Scars
- Post-Surgical Scars/New Scars
- Scar Lightening
- Scar Prevention
- Stretch Marks
