CENTER_{RX} 

Experience the Difference

How Can Compounding Help Your Practice?

Compounded medications are “made from scratch” - individual ingredients are mixed together in the exact strength and dosage form required by the patient. This allows the compounding pharmacist to work with the patient and the prescriber to customize a medication to meet the patient’s specific needs.

Quality You Can Trust

The Compounding Center - has been accredited by the Pharmacy Compounding Accreditation Board (PCAB™) since October of 2009.

Helping you help your patients

- You have the option to consult directly with our highly trained pharmacists about services related to sterile and non-sterile compounding.
- Your patients will feel better knowing their products are compounded at the only accredited pharmacy in the Washington DC Metro area.
- Your patients will have access to their prescriptions since we are licensed to practice in DC, MD, PA, VA and WV.
- You can grow your practice through innovative customized medical care.
- Your patients will experience a level of customer service expected only from a local and employee owned business.
