Customized care to meet your unique needs

Experience the Difference

Why You Can Rely On Us

We've been privileged to serve our community for almost 40 years. We have learned the best way to make a difference in our patients' lives is to offer personalized care, whether that is for medical equipment or custom compounded prescriptions.

Compounding Can Simplify Your Life

Compounding means mixing the exact ingredients needed to create a customized prescription medication to meet the patient's individual needs. **Let us help solve your medication problems.**

- Allergies to "filler" ingredients found in mass produced drugs.
- Medication needs to be in different dosage form (liquid, capsule, cream, etc.).
- A pet needs a flavored dose for easier administration.
- Medication is not commercially available or not available in the dose needed.

How Can We Help You

We will work with you to find the perfect medical device, the right compression sock, or that hard to find bath safety item! We have what you need to be independent and healthy. And, when it comes to compounding, it's not just about putting pills in a bottle; our experienced and knowledgeable staff want to create medications that will help improve your health and quality of life.
