Conveniently Serving 5 States

We offer shipping on all of our products to patients living in:

- Maryland
- Pennsylvania
- Virginia
- Washington D.C.
- West Virginia

Quality You Can Trust

The Compounding Center has been accredited by the Pharmacy Compounding Accreditation Board (PCAB™) since October of 2009. We are proud to be the first compounding pharmacy in the Washington D.C. metropolitan area to achieve this recognition in both sterile and non-sterile compounding.
Customized Medications

Each and every one of your patients is unique and their medication should be too. Let us put more tools in your toolbox when it comes to medication challenges. A finicky cat may do better with transdermal Methimazole and a large dog will come running when it's time for his chicken flavored Gabapentin!

Compliance with prescribed therapy is crucial to successful treatment.
